SUMMARY

Full Stack Software Engineer with 3+ years of experience in software development, almost 2 years delivering production-grade Fintech and e-commerce platforms. Built and shipped a live cryptocurrency exchange mobile application to both the App Store and Google Play. Experienced in microservices architecture, REST API development, cross-platform mobile development with Flutter and BLoC, and containerized deployments using Docker and Kubernetes. Strong academic record (GPA 3.71) with a Computer Science degree specializing in Software Development. Seeking a software engineering role to build scalable, secure, and high-impact systems.

WORK EXPERIENCE

Full Stack Developer | SINEGY Digital Asset Exchange — Penang, Malaysia *April 2025 – Present*

- Led end-to-end development of the SINEGY cryptocurrency exchange mobile application using Flutter and the BLoC state management pattern; managed full release lifecycle including App Store and Google Play Store deployment.
- Designed and maintained high-availability backend microservices using .NET Core, Laravel, and Node.js within a Dockerized and Kubernetes-orchestrated environment to support real-time digital asset trading.
- Represent SINEGY at Penang Digital Economy Conference 2025, Re-Introduction to Bitcoin events, Monie Fest 2026
- Analyzed user behavior and collaborated cross-functionally with the marketing team to identify UX improvements that reduced friction in key trading flows.
- Led end to end System Internal Testing (SIT) and do code review for other developers works.

Software Engineer Intern | Longbow Solutions Sdn Bhd — Cyberjaya, Malaysia *October 2024 – March 2025*

- Designed and implemented an SEO Configuration Module for the IOI City Mall Online Ticketing System (OTS), integrating TikTok Pixel, Meta Pixel, and Google Tag Manager for cross-platform marketing analytics.
- Developed frontend and backend modules for IOI City Mall CMS, OTS, and OWG CMS using .NET MVC and modern JavaScript, improving content management efficiency for non-technical staff.
- Integrated the CLUB IOI loyalty application with OTS, enabling QR code-based loyalty points earning, redemption, and cancellation across web (MVC) and POS (WPF/MVVM) systems.
- Conducted on-site User Acceptance Testing (UAT) for Self-Service Kiosk (SSK) and POS systems, identifying and resolving critical bugs prior to production go-live.

PROJECTS

SINEGY Digital Asset Exchange Ecosystem *April 2025 – Present*

Technologies: Flutter, BLoC, .NET Core, Laravel, React.js, Angular, Node.js, Docker, Kubernetes, PostgreSQL, Redis

1. Crypto Exchange Web App (React js Redux) :

- Develop new features such as announcement banner, Lightning network UI, check for vulnerability, update deprecated packages and libraries

2. Admin Panel for Operation (Angular) :

- Develop new modules for Push Notification management, and compliance features

3. Crypto Exchange Mobile App (Flutter BLoC) :

- Built a cross-platform cryptocurrency exchange mobile app (Flutter/BLoC) handling the full development lifecycle: requirements, architecture, UI/UX design, UAT documentation, and deployment to App Store and Google Play Store.
- Designed and implemented architecture for Push Notification, Deeplink, and Biometric Authentication for mobile app.
- Update SDK, packages based on Android and iOS retirements .

4. Microservices Backend (.NET Core, Laravel, Docker) :

- Designed optimized architecture for Push Notification integrated with Firebase, Circuit Breaker for trading and Cloudflare worker for Deeplink.
- Maintained and enhanced microservices backend supporting real-time order matching and internal financial operations. Containerized with Docker and orchestrated via Kubernetes.

- Implemented automated regulatory compliance pipeline using scheduled Laravel jobs and PostgreSQL within Dockerized environments, produces 100% accurate reports with zero manual intervention and a fallback manual command. (Daily auto update to Security Commission Malaysia via SFTP).

IOI City Mall OTS and CLUB IOI Loyalty App Integration

November 2024 – March 2025

Technologies: .NET Framework, MVC, WPF, MVVM, jQuery, HTML, CSS, REST APIs

- Integrated loyalty points integration (earn, redeem, cancel) between the IOI City Mall Online Ticketing System and third-party CLUB IOI application (REST APIs & .NET Framework).
- Built WPF-based POS user interface and HTML/CSS ticketing frontend; conducted UAT on Self-Service Kiosk hardware in a live retail environment.

Emergency Case Management System with Automated IoT Traffic Clearance

March 2024 – September 2024

Technologies: Flutter, Laravel, C++, IoT, GPS

- Digitized manual emergency case forms into a mobile and web application, reducing data entry time and improving workflow efficiency for emergency responders.
- Integrated real-time GPS location tracking with an automated traffic signal clearance system using IoT hardware to clear routes for emergency vehicles.

JomPick — Parcel Management System

October 2023 – January 2024

Technologies: Flutter, Laravel, REST APIs, Push Notifications

- Awarded Platinum Award at the FTMK UTeM Workshop II Innovation Competition for innovation aligned with UN Sustainable Development Goals.
- Engineered parcel management features including real-time status tracking, pickup scheduling, push notifications on arrival, and proof-of-pickup capture.

EDUCATION

Bachelor of Computer Science (Software Development)

September 2021 – March 2025

Universiti Teknikal Malaysia Melaka (UTeM), Melaka, Malaysia GPA: 3.71 / 4.00

- Dean's List Award every semester
- Relevant coursework: Software Engineering, Data Structures and Algorithms, Database Systems, Mobile Application Development, Object-Oriented Programming, Network Security

Matriculation Certificate — Basic Engineering

August 2020 – May 2021

Kolej Matrikulasi Kejuruteraan Kedah, Kedah, Malaysia GPA: 3.67 / 4.00

TECHNICAL SKILLS

Programming Languages: PHP (Proficient), C# (Intermediate), Dart (Intermediate), Java (Intermediate), C++ (Intermediate), JavaScript, TypeScript, Python

Frameworks and Libraries: Flutter, BloC, Laravel, .NET Core, .NET Framework, MVC, MVVM, WPF, React.js, Redux, Angular, Spring Boot, Node.js

Databases: PostgreSQL, MySQL, Microsoft SQL Server, SQLite, Redis

DevOps and Infrastructure: Docker, Kubernetes, GitLab CI/CD, GitHub Actions, Linux

Tools and Platforms: Git, GitHub, GitLab, Bitbucket, REST APIs, App Store Connect, Google Play Console, Postman

Software Development Practices: Microservices Architecture, Agile/Scrum, Unit Testing, UAT, Repository-Service Pattern, SOLID Principles

CERTIFICATIONS AND AWARDS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- Google Cloud Computing Foundations Certificate — Google
- Dean's Award — Every Semester, Universiti Teknikal Malaysia Melaka
- Platinum Award — Workshop II Innovation Competition, FTMK UTeM (JomPick Project)
- 4th Place — Code Arena Programming Competition, FTMK UTeM
